Mathew Peters

Location: [Bengaluru] | +91-9148831997 | mathewpeters22@gmail.com | [LinkedIn - http://www.linkedin.com/in/mathew-peters-7b485b213]

Target Role: DevOps Engineer | Cloud Engineer | Site Reliability Engineer | Experience: 4 Years

Professional Summary

Results-driven Cloud Ops Engineer with over 4 years of experience in cloud infrastructure, CI/CD automation, and containerized application deployments. Skilled in Kubernetes, Terraform, Jenkins, and Azure. Proven track record of automating production environment deployments, optimizing infrastructure efficiency, and reducing downtime during critical migrations. Passionate about building scalable and secure cloud solutions.

Core Skills & Tools

Programming & Scripting: Python, Linux, Bash, PowerShell

Cloud Platforms: Azure, AWS(Basic)

CI/CD & DevOps: Jenkins, Docker, Kubernetes, GitLab, Bitbucket, GitHub actions

Infrastructure as Code: Terraform, ARM Templates, Ansible

Networking & Security: Vnet, Subnets, Load Balancers, VPN, Security Groups, IAM

Messaging & Streaming: Confluent Kafka, Apache Kafka

Databases: MSSQL, MongoDB, PostgreSQL

API & Integration: RESTful APIs, Postman, JSON, YAML, Helm charts

Containerization & Orchestration: Docker, Kubernetes, Helm, ArgoCD

Monitoring & Observability: Grafana, Datadog, Coralogix

Cloud Operations & Reliability: Environment Provisioning, Release Management, Incident Management, Production Support, Tenant Copy Operations

Professional Experience

CloudOps/DevOps Engineer(Converted from Intern) | Mar 2022 – Present) — OneTrust, Bengaluru

- Worked on setting up new Dev, Staging and production environments with automated provisioning and configuration using Terraform and Ansible(for Virtual Machines).
- Supported release deployments for multiple environments including dev, staging, and production.
- Maintained and supported 60+ Kubernetes (AKS) clusters across multiple environments also performed routine cluster health checks, node management, and issue remediation.
- Provisioned, maintained, and monitored Confluent Kafka clusters for production environments, ensuring high availability and operational reliability.
- Worked on Tenant copies across various production environments ensuring no data loss.
- Extensive experience with Microsoft Azure services including VMs, AKS, SQL Database, Cosmos DB, and ARM for scalable infrastructure management.
- Worked with Terraform to provision and manage cloud infrastructure, enabling automated, repeatable, and scalable deployments.
- Managed GitLab and Bitbucket repositories for version-controlled modules.
- Maintained CI/CD pipelines using Jenkins, integrated with Gitlab pipelines and GitHub actions to improve release velocity and deployment reliability.
- Maintained secure, scalable networking on Azure (VPNs, load balancers, NSGs) to support production workloads.
- Collaborated with application, platform, and security teams to deliver production-ready environments.
- Supported SecOps initiatives by identifying and remediating security issues across VMs and cloud infrastructure using Qualys and Wiz.
- Reduced Mean Time to Resolution (MTTR) by improving incident triage and observability across 60+ production environments using Grafana, Datadog, and Coralogix.
- Worked alongside team for automated operational tasks using Python, Bash, and PowerShell to support DevOps workflows and infrastructure health checks.
- Conducted end-to-end testing of RESTful APIs with Postman to ensure reliability and integration of automated provisioning workflows.
- Collaborated with cross-functional teams to implement security best practices and infrastructure hardening.
- Implemented and supported Single Sign-On (SSO) configurations using enterprise identity providers.
- Supported SCIM-based user provisioning and deprovisioning, ensuring accurate identity synchronization.

Key Projects

- Led end-to-end infrastructure provisioning for more than 60+ environments using Terraform, ensuring scalable and repeatable deployments, provisioned and configured virtual machines, databases, and supporting cloud resources, including subnet selection and network setup, implemented Databricks Insights to enable reporting.
- Confluent Migration — Led migration of Confluent clusters to new infrastructure, Achieved near-zero downtime during migration windows
- Successfully delivered 20+ multi-release deployments for Production environments**,** maintaining platform stability and consistent release quality.
- Owned end-to-end tenant copy operations as an SME, ensuring reliable execution across production environments and serving as the primary escalation point, significantly reducing turnaround time.
- Supported end-to-end disaster recovery (DR) operations across dev, staging, and production environments, including infrastructure provisioning and cross-region failover execution.
- Also delivered on-prem production tenant copies as well, while troubleshooting complex copy-related issues.

Education

- Bachelor of Engineering in Electronics and Communication — KLE Technological University, Hubballi, Karnataka, India (08/2018 - 05/2022
- Pre-University — Vidyaniketan PU Science College

Certifications

- Cisco Networking Essentials (05/2021)
- Microsoft Certified: Azure AI Fundamentals (AZ-900) (02/2022)
